SCOTTSDALE -- Gainey Suites Hotel, located in the exclusive Gainey Ranch, has completed a \$3.7 million renovation transforming its 162 guest suites to a new level of elegance, according to Rich Newman, general manager of Gainey Suites Hotel.

Representing the essence of contemporary Scottsdale style and comfort, all suites now feature wide-board hardwood and honed marble tile floors, rich carpeting, dramatic floor-to-ceiling draperies and crown molding accenting new bedding and furnishings created in warm desert palates.

Luxurious marble bathrooms and vanity areas with "natural rain"-style showerheads with five settings from massage to mist, artisan-crafted vanity mirrors and lighting treatments now provide a more relaxing and elegant bath experience.

Guest suite furnishings feature new posh sofa/sleepers, custom-made console dressers and side tables accented with one-of-a-kind art and accessories in addition to LCD flat-screen televisions.

The Gainey Suite Dreams Bed has become even dreamier with the addition of 300-thread count linens and allergy-free plush down featherbed, comforter and four soft pillows accented with a distinctive padded faux leather framed headboard.
